### Don't Sell Yourself Short.

With your own business you choose your territory. You're the boss. Some people think going on their own is too risky. Working for a large corporation has given them a false sense of security. ## Let SYNDYX Be the Key to Your Future Success.

My name is Skip Hathaway and I have been in the chemical industry for over 30 years. I have worked for leading corporations as both a salesman and as a managerial executive. The problem is: a lot of people just don't realize that they have what it takes to be successful on their own. But their bosses sure do, because those employees are making the company big bucks. If you can make someone else money, you can certainly do the same for yourself! Like a lot of people in business, I know my instincts are actually right on the money. That's why I had to go out on my own. Starting my own chemical business was the best thing I could have done. Because of my own ambition and business talents, I make more money than I could have working for a large company. And guess what? I'm a lot happier being my own boss. You can be too!
